...ts/dev/ambitious-project-draft — · Replace Section H Template — caffeinate ◂ claude

All upgrades applied. Let me capture viewports to verify the results.

rhinomcp - capture_viewport (MCP)(viewport: "perspective", zoom_to_fit: true, show_grid: false)

└ [Image]

rhinomcp - capture_viewport (MCP)(viewport: "top", zoom_to_fit: true, show_grid: false)

└ [Image]

Good — the layer colors are now material-matched. I can see the warm wood joists, cream walls, dark steel beam, and the skylight in blue. Let me get an interior perspective to check the lantern ribs and glass panes.

rhinomcp - set_presentation_view (MCP)(view_type: "isometric", display_mode: "Shaded")

└ {
"result": "Script successfully executed! Print output: View set: type=isometric, azimuth=45, elevation=30, distance=123.6\nDisplay mode set to

rhinomcp - capture_viewport (MCP)(viewport: "perspective", zoom_to_fit: true, show_grid: false)

└ [Image]

Good exterior view — colors look much more realistic now. Let me get an interior view to verify the lantern ribs and glass panes.

rhinomcp - execute_rhinoscript_python_code (MCP)(code: "\nimport rhinoscriptsyntax as rs\n\n# Position camera inside the space, looking north along the west wall\n# to see lanterns, windows, and glass panes\ncamera = [8, 5, 6]\ntarget = [8, 45, 6]\nrs.ViewCameraTarget(None, camera, target)\nrs.ViewCameraLens(None, 28) # wide angle\nprint(\"Interior view set: looking north from south end\")\n")

└ {
"result": {
"success": true,
