ambitious-project-draft — Replace Section H Template — caffeinate ◂ claude

All upgrades applied. Let me capture viewports to verify the results.

● **rhinomcp - capture_viewport (MCP)**(viewport: "perspective", zoom_to_fit: true, show_grid: false)
└ [Image]

● **rhinomcp - capture_viewport (MCP)**(viewport: "top", zoom_to_fit: true, show_grid: false)
└ [Image]

Good — the layer colors are now material-matched. I can see the warm wood joists, cream walls, dark steel beam, and the skylight in blue. Let me get an interior perspective to check the lantern ribs and glass panes.

● **rhinomcp - set_presentation_view (MCP)**(view_type: "isometric", display_mode: "Shaded")
└ {
"result": "Script successfully executed! Print output: View set: type=isometric, azimuth=45, elevation=30, distance=123.6\nDisplay mode set to

● **rhinomcp - capture_viewport (MCP)**(viewport: "perspective", zoom_to_fit: true, show_grid: false)
└ [Image]

Good exterior view — colors look much more realistic now. Let me get an interior view to verify the lantern ribs and glass panes.

● **rhinomcp - execute_rhinoscript_python_code (MCP)**(code: "\nimport rhinoscriptsyntax as rs\n\n# Position camera inside the space, looking north along the west wall\n# to see lanterns, windows, and glass panes\ncamera = [8, 5, 6]\ntarget = [8, 45, 6]\nrs.ViewCameraTarget(None, camera, target)\nrs.ViewCameraLens(None, 28) # wide angle\nprint(\"Interior view set: looking north from south end\")\n")
└ {
"result": {
"success": true,
… +4 lines (ctrl+o to expand)

● **rhinomcp - capture_viewport (MCP)**(viewport: "perspective", show_grid: false)
